

## quality · service · innovation

ENVASES is always focused on improving quality and efficiency. These improvements are achieved by investing in R+D and from our experienced employees who actively participate in the continuous improvement.

Envases' two modern European production plants offer expertise, innovation and tooling developed in-house and are fully equipped to handle your packaging requirements.

Customers with well known brands place their confidence in our highly reactive and trusted service.

We are a 4th generation family business, with over **75 years experience**.

High investments in innovation and patented technologies with a wide range of aluminium cans and bottles.

Envases' two modern European production plants offer expertise, innovation and tooling developed in-house and are fully equipped to handle your packaging requirements.

Customers with well known brands place their confidence in our highly reactive and trusted service.

## Our philosophy

**ENVASES** is always focused on improving quality and efficiency. These improvements are achieved by investing in R+D and from our experienced employees who actively participate in the continuous improvement.

**ENVASES** is an employer committed to ensuring that all employees develop their professional skills while enjoying a stable job and promotion opportunities.

# ONE INCH OPENING

The Most Versatile Opening

Wide range of diameters, heights, shaping and printing.  
From diameter 35 to 66.

## MARKETS

**About 80 per cent of the world's production still goes into the cosmetics sector but due to its outstanding functionality the share of aluminium aerosol cans is growing year on year in other markets.**

- Personal Care : Deodorant, Eau de Toilette, Hair and Body care.
- Beauty products: Serum, Makeup, Moisturizing Cream, Self Tanning.
- Pharmaceutical: Analgesics, Antiseptics, Nasal and Ear Hygiene, Vitamin complex, Repellents.
- Household: Sanitizers, Air Fresheners, Essential Oils, Cleaning, Lens Care, Hearing Devices.
- Food: Vegetable Oils, Whipped Cream, Pancake Batter, Egg Glazing.
- Automotive: Lubricants, Tyre Repair, Liquid Snow Chains, Car Care.

## PROPERTIES

Aluminium aerosol cans guarantee a high standard of product integrity.  
The monoblock manufacturing process provides excellent barrier properties.

Due to their excellent material and barrier properties aluminium aerosol cans are suitable for use with all types of propellants and formulations.

Depending on the formulation, cans may be partially uncoated, have a protective inner coating or use a bag-on-valve system.

They can be stored and transported in complete safety ensuring safe handling along the entire supply chain.

## SUSTAINABILITY

Lightweight, Strong & Infinitely Recyclable  
Aluminium is not consumed, it is used. About 75 per cent of all aluminium ever produced is still in the material loop today.

Aluminium aerosol cans are environmentally friendly: up to 95 per cent less energy is used to produce secondary aluminium than is used to produce primary aluminium reducing its carbon footprint.

The lightweight attribute of aluminium is – in relation to transport – another key factor in CO<sub>2</sub> emission reductions.

# SHAPING & REGISTERED SHAPING

Shape Up Your Brand

---

Envases patented registered shaping technology offers a full customisation of your can, taking the range of shaping to new levels.

Registered shaping will differentiate your brand from the existing shapes, and also improve the ergonomics of the can.

# EMBOSSING & DEEP EMBOSSING

Emboss Your Brand

---

Enhance your brand image with Envases worldwide patented embossing and deep embossing technology.

Envases deep embossing technology makes it possible to emboss further down the length of the can.

Guarantee authenticity of your products and protect against counterfeits with a deep embossed logo.

## HOT STAMPING

Let Your Brand Outshine the Competition

---

Hot stamping gives your packaging a prestigious finish and enhances your brand image.

Envases hot stamping technology is produced in-line with the benefit of reduced leadtimes.

Different foil colours to match all your designs.

## SPECIAL FINISHES

Differentiation

---

Envases is focused on providing added value containers. With this approach, Envases has developed some special finishes that allow clients to create exclusive designs.

- Touch Effect: Creates a tactile pattern effect on the surface of the can.

- Matt & Gloss: Combine matt and gloss finishes on the same can.
