About us: the world of spray paints

Find out everything about us – how we came about, our history and our future, what and how we produce and what makes us different.

Founded in 1963

34 Mio. cans annually

440 employees

Made in Germany

Peter Kwasny GmbH is a medium-sized family company that has been developing innovative and patented solutions for paint aerosol systems and producing paint sprays, touch-up pencils and preparation products for a wide range of requirements and markets for over 60 years.

Brands

The brands of the Peter Kwasny GmbH

Kwasny's high-quality products are used in a wide range of application fields, for instance in the hobby sector, and by trade and craft professionals and painting specialists. We started off with Auto-K, the practical do-it-yourself solution for simple and fast paint repairs on cars. Today, our product range is popular among both professional users, professionals in painting booths (SprayMax) and also do-it-yourself users, or designers who use the products to decorate homes or in the hobby field. Today, Kwasny has become an international specialist for spray paint systems. The reputation we enjoy among our customers for the quality of our brands is motivation to continuously improve our products.

Auto-K

The classic product in the spray paint

As the "paint shop in a can", the traditional Auto-K brand, has enjoyed a leading market position for many years. Today, the original Auto-K products offer the possibility for fast, cost optimised and colour accurate paint repair, starting with the preparation products such as filler, sand paper and adhesive tape through original colours as spray paint or touch-up pencils up to many special and effect paints. The latest innovation is Liquid Gum, the peel-off spray film from Auto-K.

- ✓ Traditional and cult brand for spray paint cans
- ✓ Full range of car repair and tuning products
- ✓ Original car repair quality for perfect paint results

SprayMax

The professional aerosol painting system

SprayMax is a patented aerosol technology for professional users. The painting system is used for repairs and spot repairs in the automotive sector and by industrial users and painters. The spray pattern of SprayMax is comparable to a spray gun but delivers less overspray. This complete professional paint system allows effective and profitable paint repairs, even outside the paint booth. Thanks to the optimised spray behaviour combined with the 2K technology, SprayMax has become a fixed feature in all application areas where paint is used. The SprayMax system uses the paint manufacturers' original products to guarantee perfect results in SprayMax quality.

- ✓ Unique SprayMax aerosol spray paint technology, inclusive 2K technology
- ✓ For effective and profitable paint repairs (automotive, industrial and painter)
- ✓ Perfect paint results, just like a spray gun (less overspray)

belton

For decorative and creative applications

The belton brand is synonymous with quality, creativeness and innovative spray paint ideas. belton spray paints can be used to enhance and redesign decorative objects of all kinds and are ideal for creative techniques, such as e.g. stencils or speckled designs. belton has a wide range of primers, special and effect paints, and also 'belton-free' which is an innovative water paint technology that sets completely new standards for environmentally-friendly painting. Be inspired by the belton spray paints and the sky's the limit for your ideas.

- ✓ Brand for decorative and creative applications
- ✓ Range of primers, special and effect paints
- ✓ Solvent or water-based (belton free technology)

Multona

The Colour Approach System

MULTONA is an approximate colour system for simple, fast and cost-effective car paint repairs. An approximate colour is not an original colour and only approximates a specific automotive factory colour. The MULTONA system is based on a finely graded and logically constructed colour spectrum. MULTONA offers an even broader and updated colour range. New to the range are the practical MULTONA 9ml touch-up pencils for minor paint repairs.

- ✓ Ideal for low-cost paint repairs to cars
- ✓ Wide colour spectrum offers a variety of approximate shades
- ✓ 9ml touch-up pencils, perfect for small and precise repairs.

Kwasny Fill In

FILL IN - colour variety made easy

Spray can prefilled with propellant gas and solvent for one-time filling with paints using suitable filling equipment. Suitable for 1K and 2K solvent-based paints. Contains an integrated converter for processing 2-component paints. The Fill In cans can be filled using the clean-free FillClean filling device, the classic Kwasny filling device or another spray can filling device.

SprayTEC

Consisting of the two product lines 'Technical Aerosols' and 'Underbody Coating Products'

SprayTec speciality products are available for repairs, care, value retention and cleaning. Ideal for cars, industry and trade. SprayTec products are ideal for commercial use, a wide range of technical applications and DIY

- ✓ SprayTec offers special products for repair, care, value retention and cleaning
- ✓ Long-lasting protection against wear, corrosion and weathering
- ✓ Available as a 500 ml spray, 1,000 ml spray can or for brushing

Racing

The entry-level price brand for DIY and home improvement stores

RACING ist die Preiseinstiegsmarke für Bau- und Heimwerkermärkte und umfasst besonders absatzstarke Produkte in einem kompakten Sortiment. Ideal als Zweitplatzierung für die Autoabteilung.

- ✓ kostengünstige Option für Bau- und Heimwerkermärkte
- ✓ 2-Schicht-Klarlack eignet sich für fast alle Untergründe
- ✓ Eignet sich für Autoabteilung, Hobbyisten sowie Heimwerker

Spraila

The entry-level price brand for the specialised automotive parts trade

SPRAILA is the entry-level price brand for the automotive parts trade. The compact, fast-moving Spraila range enables simple repairs at a low price. Spraila is available in promotional displays and is also suitable as a decorative paint for numerous applications.

- ✓ Entry-level price brand for the automotive parts trade
- ✓ Also ideal as a protective coating for objects of all kinds in the home and garden.
- ✓ Suitable for metal, wood, stone, glass, ceramic, clay, paper and some plastics.

hitcolor

hitcolor is the entry-level brand for solid spray painting in the decorative sector. hitcolor is a well-rounded, compact spray paint assortment that ranges from primers to popular colours to clear coat. With hitcolor, the cost-effective alternative, it's easy to get colourful.

The hitcolor entry-level brand offers:

- ✓ Compact spray paint assortment
- ✓ For various surfaces and materials
- ✓ Ideal for DIY, home, hobby and workshop
- ✓ Very good price-performance ratio

2K PRO

PRO Technology made for Professionals

The specially developed and newly formulated 2-component technology for the DIY market is not comparable with conventional spray can technology and opens up many new and better possibilities for DIYers in terms of quality, processing and painting results.

The 2K PRO spray paint technology is based on the patented, long-standing, proven 'can-in-can system', with a separate, integrated hardener cartridge and, in particular, on the novel formulation of the hardener system.

- ✓ RAL-accurate colours
- ✓ Patented 2K technology from the spray paint can
- ✓ Closed system - no oxygen entry, thus longer processing time

YOUR
OWN
PRODUCT

Private Label

*„We find technical solutions for every customer requirement.
And if it doesn't yet exist, we simply develop it ourselves“*

- Dr. Götz Wilbert - Sales Director Private Label

Private Label

Customised products

Besides our own brands Auto-K, belton and SprayMax, the Private Label production is an important part of our portfolio and success. Together with our clients we develop specific solutions and product designs. We can also fill your own paint materials in aerosol cans or touch-up pencils (contract-filling). We have a wide variety of can sizes, components and flexible implementation possibilities for projects of this kind.

- ✓ Wide range of can sizes, components and configurations
- ✓ Use of customer-own paint materials or substrates
- ✓ Business structure: direct sales (car, decoration), DIY-retailers, automotive industry, paint industry and general industry

✓ Your system

Whether solvent- or water-based coating systems, our experienced team and our production facilities specialise in individual solutions and develop your desired spray paint product.

✓ Your label

Our graphics team is happy to take on the layout design and is very familiar with the specifications and regulations of the labelling requirements (CLP, REACH, UFI, etc.) of
