

# We are the **made in Italy** aerosol factory

## Mission

Ambro-Sol wants to confirm and consolidate its role as a **European reference** in the production and distribution of aerosol products for DIY and industry, favoring a positive impact on society. The slogan “**Your Factory of Aerosol**” refers to the industrial but also family dimension, typically the bearer of social, environmental and economic objectives while respecting relations with all stakeholders. A company at the service of the customer with eco-sustainable innovations and high quality products “Made in Italy”, keeping intact the values of over 30 years of history.

## Vision

We would like to be a cultural point of reference and excellence in the aerosol industry at a global level and at the same time foster relations with local partners in total respect for people and the environment. A company focused on the constant search for innovation that offers the best products, supporting people in their work, in their hobbies and in all their creative moments, helping them to keep in perfect condition their most expensive goods. **Promoters of the culture of recycling and regeneration** with high standards of quality, safety and reliability.

**We innovate the aerosol world with cutting-edge solutions**

The innovative Ambro-Sol production facility is one of the most advanced facilities in Europe in the aerosol industry, offering **cutting-edge technology and high safety standards**. Thanks to the customer-oriented mentality, Ambro-Sol has established itself as a symbol of Made in Italy in the world, with eco-sustainable innovations and top-notch Italian quality. Our philosophy of **factory at customer service** guides us in the production of sprays more and more performing and efficient, to ensure maximum satisfaction of our customers around the world.

### **Research and Development**

Over the years, the Research and Development department has produced **more than 1200 formulations** for products of different categories: lubricants and greases, maintenance, cleaning, car care, welding, galvanizing products and paints.

## Technical laboratory

Within the technical laboratory, the team of experts selects the **best propellants, types of cylinders and dispensing valves** to ensure maximum efficiency, testing effectiveness and safety of our sprays.

## Quality control

At the end of the production chain, the quality control office verifies that all Ambro-Sol products **comply with the required characteristics and European and international standards** for the production of aerosol sprays.

## The Surgical Medical Device that was missing

## Choose an authorized PMC laboratory

We are manufacturers of Medical Surgeries. Our plus point? The **new in-house PMC Laboratory** that guarantees the highest possible quality. From studying the perfect formulation, to the most competitive price you can expect.

## **The spray disinfection certified by Ambro-Sol**

The high quality of the new product ensures maximum efficiency in terms of usability and disinfection. The disinfectant spray does not need any mechanical gesture: just a spray and the product performs its function.
